Let's Start!

Breaking Down a Cloud Service Contract

Learning Outcome:

Understand information about people's backgrounds in spoken or written documents.

Interpret the IT needs assessment, to determine the required technology to manage information, according to the rules and protocols established by the company.

Can Do Statements:

- I can understand written information about cloud computing definition and components.
- I can use vocabulary related to the components of a cloud contract.
- I can write a simple text to talk about the importance of understanding the components of a cloud contract.

Ask your partner:

- What do you think are the essential parts of a cloud contract?
- Why do you think it is essential to review the components of a cloud contract before negotiation starts?

Let's Explore!

Getting to Understand the Components of a Cloud Contract

Instructions: Read the text below.

What is understood by cloud computing?

Nowadays, cloud-computing services are becoming incredibly popular among all types of computer users, ranging from individual users to huge organizations.

The popularity of cloud computing and its definition lie in its ability to provide computer processing resources on demand through an internet-based model. This means that an end customer will not need to install software and run its servers and applications. A cloud services supplier will provide applications and storage services from the supplier's data server center itself. This model allows users to be provided with computing resources with minimal management effort, and focus more on their business rather on spending lots of money on software and hardware acquisitions.

What components are included in a cloud contract?

Cloud computing is a fast evolving computing technology. As more and more businesses are focusing on depending on cloud services, many legal issues and concerns may ensue. Data protection and security are addressed as the most common legal concerns. It is, however, necessary for both parties to review the following components in a cloud contract negotiation:

Terms of Service:

Also known as the "Terms of Use". The general legal terms and conditions that establish the relationship between the vendor and the customer are set out in this part of the document as well as how the service is used.

Privacy Policy:

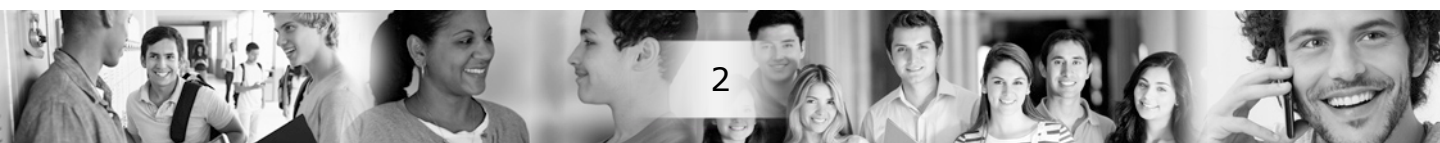

This document lays out how the customer's information is approached in terms of privacy and protection.

Acceptable Usage Policy (AUP):

This a common contract component that is used in social networking sites and cloud computing services providers. It specifies what practices are allowed or prohibited when using the service (for example, banning hate speech, or spam prohibition).

Service Level Agreement (SLA):

The SLA states the levels of service availability and describe what cloud services are promised to the customer.

Let's Practice!

What makes Cloud Computing so popular among companies nowadays?

Instructions: Find the missing words for each sentence.

1. The popularity of cloud computing is **b _ s _ d** on its ability to provide computer processing resources on demand through an internet-based model.
2. Cloud-computing is **_ _ ed** by either individual users or huge organizations.
3. Software and hardware acquisitions aren't **n _ ed** _ _ when using Cloud computing services.
4. The Acceptable Usage Policy (AUP) is **e _ t _ _ l _ s _ ed** according to allowed and banned practices when using the service.
5. Many computer resources are **s h _ _ ed** by cloud computing.

C	B	A	S	E	D	S	T	O	V	D	I	G	Y	Q
Q	F	T	V	U	R	F	G	Q	Z	H	G	B	F	C
M	N	O	B	O	P	E	Y	T	N	F	F	S	Z	M
E	Y	C	R	T	E	S	O	V	L	Y	Y	X	D	M
Q	E	D	F	J	D	T	R	B	M	L	A	X	C	Z
S	F	T	N	K	L	A	T	U	C	V	M	R	A	T
W	X	Q	A	K	R	B	Z	N	H	U	Y	T	W	T
P	Z	G	M	W	I	L	I	S	Y	K	S	C	U	N
L	I	H	L	P	L	I	H	E	N	I	K	Z	O	B
W	R	S	H	A	R	E	D	T	O	G	G	D	P	P
J	F	P	T	O	X	H	E	Z	Q	Y	T	O	V	Y
Y	C	T	E	G	Z	E	N	D	K	T	I	Q	L	H

T	C	G	O	A	T	M	H	F	J	R	Q	O	T	J
O	X	Y	J	I	U	S	E	D	Q	Y	V	S	J	X

Let's Practice!

Cloud services contracts make sure to include components that help to avoid the most common legal concerns

Instructions: Organize the mystery sentence. Read the sentences aloud. Check your pronunciation with your instructor.

1. The / to / terms / of use / are / set / establish / the / relationships
2. Privacy / approached / policy / is / protection / . / in / of / terms
3. social / AUC / is / in / networking / sites / used / .
4. by / The / cloud / described / services / SLA / . / are
5. specifications / The / allowed / are / AUP / . / by

Extension Activity

Real life Cloud computing complications!

Instructions: Complete the following steps. Fill in the Self-Assessment.

- Search for other problems with cloud services similar to the Dropbox hacking case.
- Study the case and consider the possible contract failures in it. Who's the responsible, which component in the contract was unfulfilled?
- Write a 150 words inform about your findings. Use simple present passive.

Self-Assessment

Yes

No

- I Search for other complications with Cloud services similar to the Dropbox hacking case.
- I Study the case and consider the possible contract failure
- I write a 150 words inform about my findings Using simple present passive.

☐ ☐
☐ ☐
☐ ☐

Target Words

- among** (preposition): belonging to a group or things mentioned.
e.g. Nowadays, cloud-computing services are becoming incredibly popular among all types of computer users, ranging from individual users to huge organizations.
- ensue** (verb): to happen as a result.
e.g. As more and more businesses are focusing on depending on cloud services, many legal issues and concerns may ensue.
- acquisition** (noun): the act of obtaining something.
e.g. This model allows users to be provided with computing resources with minimal management effort, and focus more on their business rather on spending lots of money on software and hardware acquisitions.

- hate speech** (expression): speech that encourages hate based on religion, sex, sexual or political orientation.
e.g. It specifies what practices are allowed or prohibited when using the service (for example, banning hate speech, or spam prohibition).
- ban** (verb): to restrict, prohibit.
e.g. It specifies what practices are allowed or prohibited when using the service (for example, banning hate speech, or spam prohibition).
- spam** (noun): unwanted email that is sent in a massive way.
e.g. It specifies what practices are allowed or prohibited when using the service (for example, banning hate speech, or spam prohibition).

Learning Points

Simple Present Passive: Statements and Questions

When we want to give importance to the object of a sentence or when the subject is not important or unknown, the **passive voice** is used.

The **passive voice** is used in the **simple present** to talk about situations that occur on a regular basis and its doer is unknown or is not important.

- To make the simple present passive in **affirmative form**, the **to be** verb is used in the **present simple** as the auxiliary, followed by the main verb in its **past participle form**:

Object	To be verb	Main verb (past participle)	Complement
Cloud contracts	are	outlined	before negotiation starts.

- To make the simple present passive in **negative statements**, the **to be** verb is used in the **present simple** as the auxiliary, followed by **not**, and the main verb in its **past participle form**:

Object	To be verb and not	Main verb (past participle)	Complement
The SLA terms	are not	defined	by the customer.

- To make the simple present passive in **question form**, the **to be** verb is used in the present simple as the auxiliary at the beginning of the question followed by the object, and then the main verb in its past participle form:

To be verb	Object	Main verb (past participle)	Complement?
Are	these terms	provided	in the contract?

Examples

- What is understood by cloud computing?*
- The general legal terms and conditions that establish the relationship between the vendor and the customer are set out in this part of the document, as well as how the service is used.*
- Data protection and security are addressed as the most common legal concerns.*

Learning Points

Outlining a Text

In case you are not writing a very short text, or a simple document, it is recommended to start your writing process by outlining the text.

An outline summarizes the information that you will include in a document. It also displays the order of how the ideas will be presented and the relationship between all pieces of information. Here, we will be listing some common steps to write an outline:

- Select a topic.
- Set out the objectives and goals of your writing.
- Gather enough supporting material.
- List the main subtopics.
- List at least two points for each subtopic if necessary.
- Think about a conclusion so that it guides you to what you want to achieve by writing the text.
